

## EXPERIENCE

---

- **i.am+** Hollywood, CA  
*Software Engineering Manager* 2018-10-01 - Present
  - Managed a small but effective backend services team
  - Lead the planning and execution of all US-based infrastructure
  - Worked with offshore QA and Engineering teams to pursue mutual goals
  - Organized deployment of microservices on a Kubernetes platform
- **i.am+** Hollywood, CA  
*Senior Software Engineer* 2016-08-22 - Present
  - Built several highly scalable services for a music streaming platform
  - Optimized elasticsearch for voice-first search on a music knowledge base
  - Built tools for fast ingestion of GBs of metadata for service consumption
  - Designed an automated pipeline for nightly music data ingestion
  - Managed projects for our MIT interns
  - Built a service for managing smartwatch registration and preferences
  - Golang, gRPC, Docker, Postgresql, Elasticsearch, Redis, Neo4j, Ruby
- **goSeek** Los Angeles, CA  
*Software Engineer* 2015-03-01 - 2016-03-01
  - Built a central API for booking hotel stays through multiple 3rd party APIs
  - Built a full-stack login authentication system
  - Worked with caching large volumes of hotel searches and results
  - Ruby On Rails, Redis, Memcached, Postgresql w/ PostGIS
- **TrackR** Santa Barbara, CA  
*Software Engineer (Consultant)* 2014-09-01 - 2015-02-01
  - Built a management tool for users to manage their Indiegogo orders
  - Built a blogging platform in Rails
  - Ruby On Rails, Postgresql, ActiveAdmin
- **resound.fm** San Luis Obispo, CA  
*Co-Founder / Lead Backend Engineer* 2014-03-01 - 2015-03-01
  - Designed and implemented data models, built APIs, managed DevOps
  - Participated in business development, marketing and social media
  - Ruby On Rails, Redis, Websockets, Postgresql, Chef, Rackspace
- **RadPad** Santa Monica, CA  
*Software Engineer* 2014-01-01 - 2014-03-01
  - Redesigned the backend apartment aggregation service to be 3x faster
  - Designed and implemented a realtime messaging service with PubSub
  - Implemented the base unit testing framework on an established application
  - Ruby On Rails, Postgresql, S3
- **Project Gigit** Los Angeles, CA  
*Software Engineer (Consultant)* 2013-10-15 - 2013-12-15
  - Built a service using concert data to help promoters identify band bookings
  - Ruby On Rails, Facebook API, Postgresql
- **Down** San Francisco, CA  
*Software Engineering Intern* 2013-06-01 - 2013-10-01
  - Built a Neo4j graph and API v2.0 for match discovery on 1.3m users
  - Ruby on Rails, Neo4j, Postgresql

## EDUCATION

---

- **Cal Poly Pomona** Pomona, CA  
*Computer Science* 2011-09-15 - 2015-02-01

## PROJECTS

---

- **resume-exporter**: A Go tool for exporting the JSONResume format to LaTeX
- **kylelucas.io**: My personal website, built in TypeScript with react.
- **plex-lametric**: A Go webserver for showing Plex data on a LaMetric Clock
- **cyberpower-exporter**: A Go Prometheus exporter for the Cyberpower UPS line
- **discord-lametric**: A Go daemon for pushing Discord Notifications to a LaMetric Clock
- **speedtest**: A Go package for running tests against speedtest.net

## VOLUNTEER WORK

---

- **PolyFounders** 2015-01-01 - 2015-06-01  
*Speaker*
- **HackPoly 2017** 2017-02-18 - 2017-02-21  
*Mentor + Judge*

## AWARDS

---

- **Eagle Scout** 2011-08-01  
*BSA*

## SKILLS

---

- **Development**: Golang, Ruby, Bash, Postgresql, Elasticsearch, Neo4j, Redis, InfluxDB
- **Tooling**: Docker, Kubernetes, Prometheus, Traefik, Grafana, Helm, Spinnaker
